## Certificate of Conformity

When used in the recommended manner as set out in the Manufacturers Installation manual, (attached to the external wall of a water bearing pipe), Sialex-Rings do not affect the chemical composition of drinking water flowing past such devices.

Laboratory examinations demonstrate, that water conforming to German drinking water standard (TVO 21.05.2001) continued to conform to the German drinking water standard (TVO 21.05.2001) after exposure to a Sialex-Ring.
