

Fight the effects of Lime scale and corrosion in water !

The Sialex[®]Ring –
modern, maintenance-free, non polluting

- Reduces lime scale build up and rust / corrosion
- Removes existing "Scale" build up
- Protects water pipes against further rust, oxidation and pitting corrosion
- Produces a "softer" feeling water
- Helps protect and preserve washing machines, dishwashers, showers, coffee
- Inexpensive, easy to install, safe

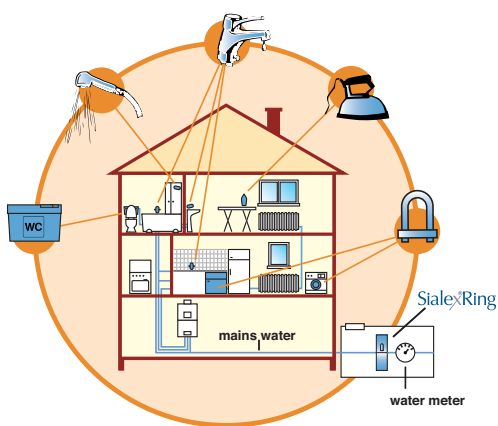

Used by industry,
now in the home.

Natural, "Two Step" effect of SialexRings:

Healthy minerals (calcium & magnesium) remain in the water supply at the same time combating the effects of lime, hard water, rust and oxidation, on water and devices attached to them.

- Reduces lime and rust in water pipes
- Residual Lime scale on walls, tiles, Shower doors etc is more easily removed. (Less effort and materials is required)
- Helps protect water pipelines against rust, copper oxidation, pitting corrosion
 - Customers have described a "softer" feel to their water
 - Helps protect and preserve washing machines, showers, Dishwashers, coffee machines etc
 - No chemical additives / Pollution free - the system works on a physical basis, no harmful chemical by-products
 - Helps combat algae and bio-film formation
 - Based upon a successful track record in industrial applications as well as property management, commercial building maintenance, and private households in Germany.
 - Installed with international clients
 - No installation costs
 - No "on-going" costs (consumables)
 - No maintenance costs
 - 5 year Guarantee

Your Sialex-Partner

Take the Sialex test

Our Offer to you:

Step 1

Contact us to receive your SialexRing for a free four (4) week "test period". No need to use a plumber, no need for an electrician, no consumables to be purchased!

Step 2

If, having tested the Ring, you wish to keep the device installed, simply contact your local provider. They will arrange everything. Should you decide not to keep the Sialex device after this initial "Test" period, contact your provider to return the device. It is as simple as that!

No risk. No hidden costs!
