

With water against lime scale, rust, oxidation and pitting

SialexRing can do even more!

Modern, maintenance-free, non polluting

- Reduces lime scale build up and rust/corrosion
- Removes existing „scale“ build up
- Protects water pipes against further rust, oxidation and pitting corrosion
- Produces noticeably softer water
- Helps protect and preserve washing machines, dishwashers, showers, etc.
- Inexpensive, easy to install, safe
- Top References: Global Clients, Proven Results

Industrial-grade quality for your home.

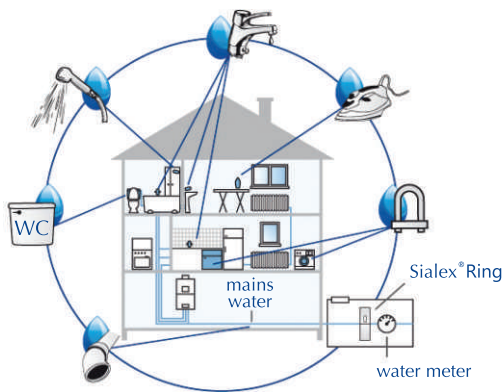

Proven for 20 years.

FOR THE HOME

The natural „two step“ effect:

Healthy, mineral-rich water is retained -
with simultaneous protection against lime scale, rust, hard water, pitting and oxidation.

Installation example
in the private sector

The Sialex[®] Ring - installed
directly after the water meter,
the ring can develop its effect
optimally and for a long time.

- Reduces lime scale and rust in water pipes
- Residual lime scale on walls, tiles, shower doors etc. is more easily removed. (Less effort and materials are required)
- Less work, time and material expenditure easier and faster
- Helps protect waterpipes against rust, copper oxidation, pitting corrosion
- Many possibilities for checking the effectiveness
- Can be used at highest water hardness ranges
- No chemical additives / pollution free
The system works on a physical basis - no chemical by-products
- Proven successfully for two decades
In use by industry, office complexes, property management companies, hotel chains, house construction and residential
- Simple and clean installation (no damage, no dirt)
- Worldwide successful installations
- Thousands of satisfied customers
- No maintenance costs, no „on-going“ costs
- No installation costs
- 2-5 years Guarantee

We guarantee: It works!

We are glad to provide advice how our technology may also be effectively employed in your home.
